Ping Pong™ Buttonbush originated at Johnson's Nursery, Inc.™ from a seedling selection made by Michael Yanny from a crop of open pollinated *Cephalanthus occidentalis*. The selection was made based on the plant's dark green foliage. Most of the plants in the block were a yellow to yellow green color due to alkaline soil induced chlorosis.

Ping Pong™ has an upright growing habit and rich, glossy, dark green leaves. The plant flowers in July, producing perfectly globular, creamy white inflorescences, similar to small Ping Pong balls. It is not uncommon for plants to have some flowers on them for over 4 weeks.

*Cephalanthus occidentalis* is a wetland shrub that can tolerate periodic flooding, so it is an excellent choice for use in wet, heavy soils. Ping Pong™ plant requires full sun and will grow to about 8' tall by 8' wide.

**Growers Licenses Are Available**
