Pink-a-licious™ originated from a selection by Michael Yanny of open pollinated seedlings of *Spiraea fritschiana* started in 2000 at Johnson's Nursery, Inc.™ The likely pollen parent is *Spiraea x bumalda* 'Norman'. Unlike its white flowered mother, Pink-a-licious™ has abundant purplish-pink, flat-topped clusters of flowers in June.

This cultivar has a wonderful compact habit, growing 2-3' tall by 2-3' wide in Southern Wisconsin. The fall color on this plant can be an outstanding combination of the colors. Pineapple yellow and watermelon pink to honeydew chartreuse, and cantaloupe orange.

Pink-a-licious™ is easy to grow, requires full sun to partial shade, and is tolerant of a wide range of soil types.

Growers Licenses Are Available
